**Professionalism** and service are the very foundation of Barbizon's long success. We work every day to make sure your job will be complete, properly executed, on time and in budget. Our staff is built of entertainment industry professionals, including lighting designers and technical directors, so we've been in your shoes. We know project changes aren't the exception, they're the rule. We also know how to work with architects and consultants.

We understand owner budgets and contractor timetables. At Barbizon, it is our highest priority to make sure that each project, no matter how large or small, is given the attention it deserves.

## Project Management

Barbizon Systems personnel are skilled in managing a project, for the architect, consultant, general contractor and owner.

Successful project management assures the design intent for all parties and streamlines the construction process.

Barbizon is committed to your project from signed contract to final sign-off.

## Design & Development

Our team is skilled at thinking on our feet and creative problem solving. In this field, it's the only way to bring projects in on time and on budget.

We have built our operation around three distinct functions that have unique and specialized needs: Systems Integration, Project Management, and Technical Services. Virtually every project will be handled by one or more of these three disciplines, providing you the strength of our collective knowledge base.

## Technical Services

Our technical staff are factory trained and certified giving Barbizon both on-site and in-house technical expertise for leading manufacturers of the entertainment industry

Our techs will be on-site commissioning every system we install to ensure its functionality.

Additionally our technical staff repairs entertainment equipment at each of our locations.

## Systems Integration

Barbizon Systems Integrators look at the whole picture, listening to the customer. Our Systems Integrations services include the following:

- Development of a system with the owner's operational requirements
- Preparation of equipment Bills-Of-Materials
- Create budgetary or purchase pricing
- Integrated systems specification for lighting, rigging, sound, and draperies
- System layout drawings such as, riser diagrams, design development, construction, drawings, device locations
- Coordination with other disciplines, i.e., power requirements to electrical engineers, or load requirements for structural engineers
- Site visitations to determine need or coordination meetings with project participants

**"Barbizon is one of the best and easiest to work with."**

*Inga Birkenstock*

*Architect – Microsoft Envisioning Center*

"Tallowood's lighting and rigging infrastructure would not exist without Barbizon's influence and direction throughout the planning, implementation, and commissioning process. We now have a lighting and system rigging system that can easily grow and expand into the future."

*Gary Revis*

*Tallowood Baptist Church – Houston, TX*

"Our lighting and dimming equipment is dated and a challenge to keep up and running, yet you are right there to assist our needs. It has been especially helpful that you will meet with my electricians at the site to perform repairs and provide information to them and school drama instructors."

*Chris Mueller*

*Charlotte Mecklenburg Schools – Charlotte, NC*
